Featured Section:

Introducing the Featured section on your LinkedIn profile:

Featured

Highlight your best work, from posts and articles to images and links. Stand out and engage your audience with your top achievements.

imagine.

Summary / About Section:

- Your LinkedIn summary is your professional "about" section, where you can highlight your experience, achievements, skills, and key information.
- It should tell a story rather than list facts.
- Craft an engaging narrative within 2,000 characters to captivate recruiters, employers, and readers.

Why is a LinkedIn summary important?

A polished LinkedIn summary can amplify your influence and propel your career goals, like landing a new job or advancing. **Here is why:**

It makes a big first impression: The LinkedIn summary introduces you = it's your 2 mins pitch - it's the first thing readers see on your profile.

It strengthens your searchability: Google indexes LinkedIn, so crafting a searchable LinkedIn summary boosts your visibility for relevant industry terms.

It adds personality to your LinkedIn page: Your LinkedIn profile showcases your professional details, while your summary lets you add personality and tell your story.

Elements of a strong LinkedIn summary:

1. Create a LinkedIn summary with a captivating hook in the first 300 words.
2. It should be easy to read like a narrative.
3. Add some Skills.

Katrina O. · 3rd

Senior Software Developer at Crown Data Systems

Miami-Fort Lauderdale Area · [Contact info](#)

Summary / About Section sample:

About

I caught fire coding.

I always thought my dream was to be a proofreader for a little indie publishing company, sipping my cafe con leche and reading the opening lines to the next best-selling vampire novel. It seemed like an appropriate dream given my BA in English. I gravitated toward proofreading and quality control positions and even started my own proofreading business. But I kind of just felt meh. I yearned to learn more, yearned to learn something different.

And that's when it happened; the spark I was missing ignited the instant I clicked play on my first Python tutorial video. (I mean seriously, how could it not be great when it's named after Monty Python's Flying Circus?) Since then, I can't get enough. Front-end web development calls to all my passions; it incorporates creativity and problem solving and I'm allowed to break it to improve the code (in a separate Git branch, of course).

I love applying responsive design principles and watching my web pages shrink into mobile screens and still look amazing. It's oddly satisfying. I think in a way I'm kind of like those web pages; I'm moldable, but I still keep my creative flare intact.

My specialties include quickly learning new skills and programming languages, problem solving, domain driven design, responsive design principles, website optimization, and the Model View View Model (MVVM) and Model View Controller (MVC) methods of organizing code. So far I have C#, .Net Framework, SQL, JavaScript, TypeScript, HTML, CSS, Angular, jQuery, Bootstrap, Jasmine, Grunt, Python, and Git/GitHub under my belt. I've started learning React, Node.JS, MongoDB, and Express.JS. I'm still enthusiastically grabbing onto any other programming languages, frameworks, or principles I can integrate into the coding web in my head.

How Katrina hooks the readers:

- With a short, provocative sentence, "I caught fire coding."
- Gives humanizing context to her career switch. "I kind of just felt meh. I yearned to learn more . . ." Her switch from proofreader to coder feels natural and real.
- Uses a keyword-rich skills list to show off her progress and intrinsic motivation in her final paragraph.

Engineering Management Specialist

Apr 2023 - Dec 2023 · 9 mos

Bengaluru, Karnataka, India · On-site

- Implemented Agile methodologies that reduced project risk through continuous integration and delivery for 4 major projects.
- Delivered products with Daily Active Users between 3000-5000.
- Coordinated in the Design and Development of complex product functionalities that helped in better deliverables within deadlines.
- Orchestrated timely code reviews within the team that helped promote clean code practices.
- Mentored and led multiple teams of 5 to 7 engineers.

♥ PostgreSQL, Java and +33 skills

Software Engineer - II

Jul 2022 - Mar 2023 · 9 mos

Bengaluru, Karnataka, India · On-site

- Transformed Monolith to Microservices architecture, improving the overall performance and scalability of the applications by 90%.
- Helped the business with cost-cutting solutions as a result of architectural migration.
- Integrated OAuth (Okta and JWT) authentication and authorization in REST APIs reducing security risks within the application.
- Coached and mentored junior developers.

♥ PostgreSQL, Java and +22 skills

Software Engineer - I

May 2021 - Jun 2022 · 1 yr 2 mos

Bengaluru, Karnataka, India

- Worked on developing core features for multiple microservices that improved the overall scalability of the applications
- Added security features to REST APIs using oauth to protect endpoints and reduce threats and attacks.

♥ PostgreSQL, REST APIs and +11 skills

Experience (bullet points + timeline + skills):

- Ctrl C + Ctrl V from CV
- Use job titles that match the jobs you apply for
- For each position max 7 bullet points
- Each BP should have max 3 lines
- Start the bullet points with action verbs
- In case of many positions in the same company, use a timeline
- Add Tech skills at the end, not in the BL
- Use the STAR method to write your BL (What + How + (Why) + **Result**)
- Include **results** when possible = **Quantifiers**

Company Projects and Personal Projects:

Including projects on your LinkedIn enables employers and interviewers to grasp your capabilities accurately for the role you are applying to. It enhances your CV and demonstrates your suitability as a candidate.

Projects

Imagine Bookstore Application

Sep 2023 - Present

A backend API for an online bookstore. The API allows users to browse and search for books, manage their shopping carts, and place orders. Each book has attributes such as title, author, genre, price, and stock quantity. The API handles user authentication, manages user sessions, and provides endpoints for various bookstore functionalities.

♥ Spring Boot, Hibernate and +5 skills

[Project 2 description and your role in it] - (PP)

1 Project

RIS/PACS

May 2007 – Mar 2011

I managed a core central project team of 6 people, who were joined by business specialists and secondees as required throughout the lifecycle of the project. The overall budget for the 4 year programme was about £10m. I took over budgetary responsibilities in 2009. In 2010 the amount under my direct control was £2.6m (capital). This programme included major capital purchases of IT systems from two vendors. I was responsible for the project contract management; this included attending monthly supplier meetings. I was involved in the annual renegotiation of supplier maintenance contracts.
